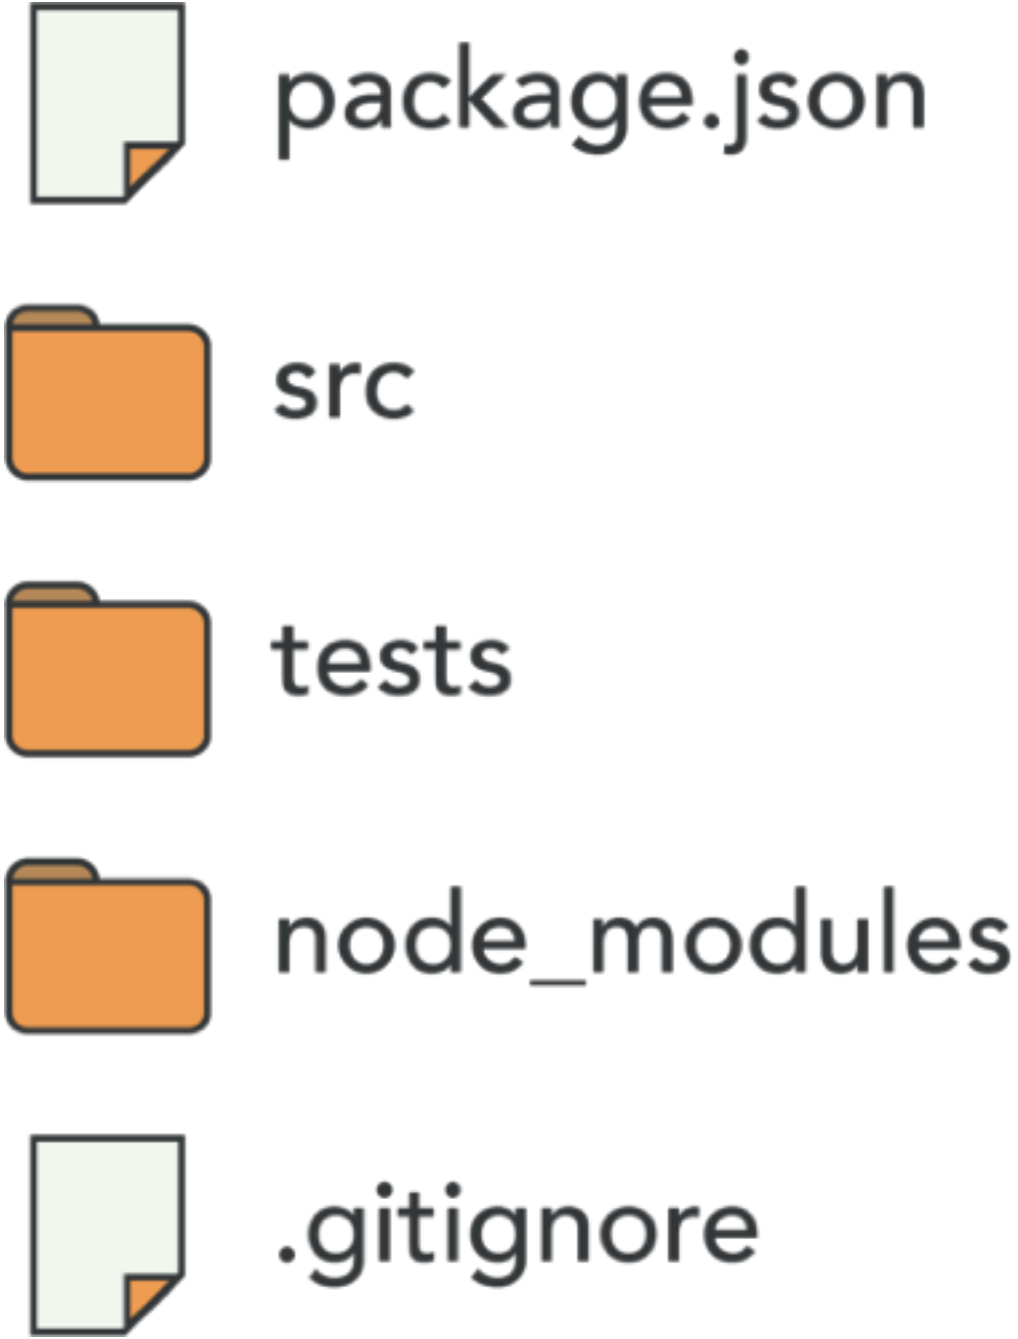
# Working tree



package.json
src
tests
node_modules
.gitignore

The **working tree** is a

single copy of one

version of the project.

The files are pulled out of

the compressed

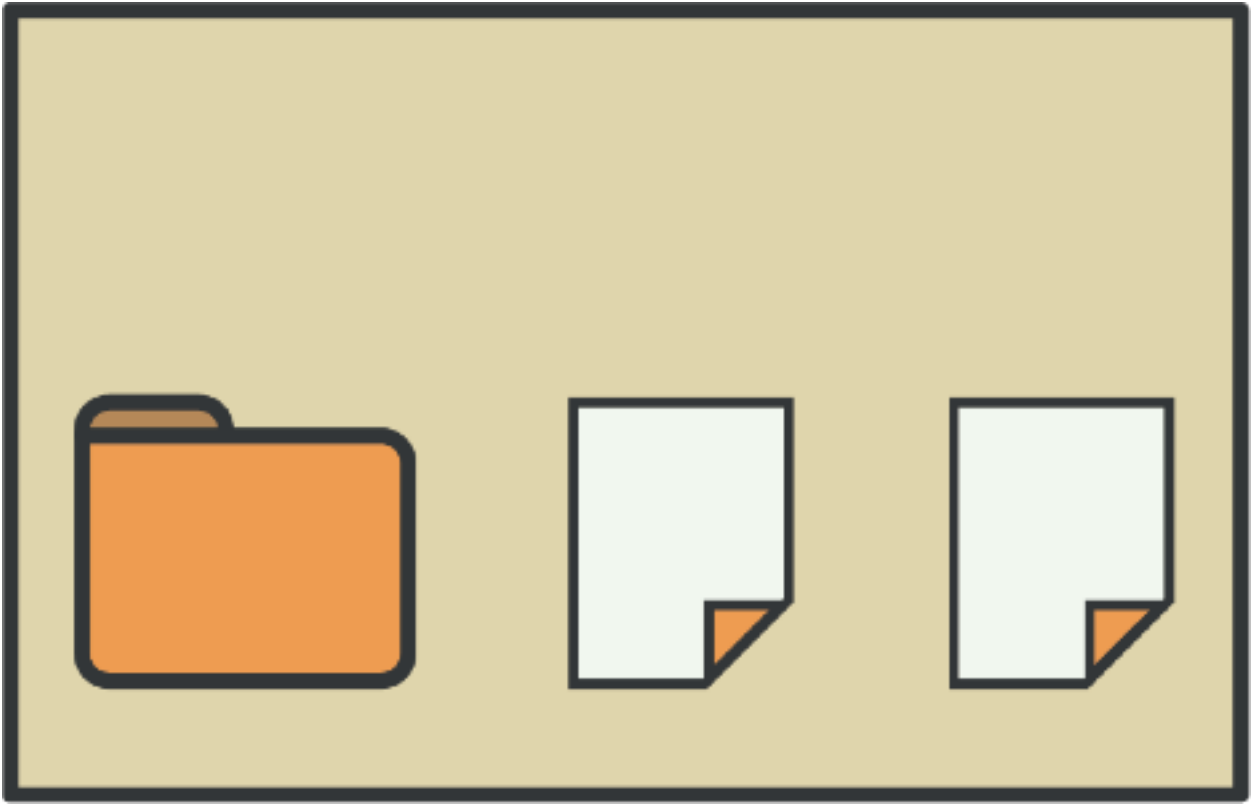
database in the Git

directory and **placed on**

disk for you to use or

modify.

Staging



.git/index

The **staging area is a**

**file**, in your Git directory,

that stores information

about **what will go** into

your next commit.
